1 Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus off your brainstorm

problem

"How might we control record access using ACLS based on field values?"

2 Ideas

Write down any ideas that come to mind the address your problem statement

- **Balasubbulakshmi** — Check Field value and allow/deny access.
- **Akaliya** — Create a condition script for access
- **Ananthapriya** — Use Fald-bored rules to restrict access.
- **Athina Sri** — Return true/false te control access
- **bhavadharani** — Use field conditions in ACLs te control access

3 Group ideas

Take turns sharing your was while clustaring simiar ar related notes Sticky rutes have been groupes, give each cluster a sentence-like labe bigger than sa sticky notes, try and ase if you and break it up into groups

Field-Based ACL Access Control

- **Balasubbulakshmi** — Check field value and allow/dery access.
- **Akaliya** — Create a condition sprips for access
- **Ananthapriya** — Use Field-based rules fa restrict access
- **Athina Sri** — Return true/false ta control access
- **bhavadharani** — Use field conditions in ACLs to control access.

4 Feasibility

This board helped evaluate the grouped ideas for feasibility use the space to place the ideas on the feasibility map.
